DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/25/2008 has been entered.

Allowable Subject Matter

2. Claims 1, 3-4, 8, 10-13, and 18-21 are allowed.

3. The following is an examiner's statement of reasons for allowance: Applicant's arguments are persuasive. The prior art does not teach or suggest a combination which yields the following claim language:

storing a boot image from a primary boot device on at least one disk within said volume group;

copying boot install images from said first boot device to multiple disks within the volume group, whereby each disk of said multiple disks within said volume group may independently serve as the boot device for the SAN system and a boot process may be initiated for the SAN system from any one of the multiple disks in the volume group, wherein the SAN system is a single, bootable computer system;

switching a boot sequence from a first boot device, which corresponds to the primary boot device and is external to said volume group, to the at least one disk within said volume group, wherein said switching step comprises:

monitoring for an occurrence of a predefined condition on said SAN system; and
initiating said switching when one of a plurality of said predefined condition occurs, wherein said predefined conditions include: (1) receiving an error signal from the first boot device when a boot up is desired; (2) being unable to access said first boot device when the boot up is desired; (3) encountering a failure on said SAN computer

Art Unit: 2145

system that results in a shut down of said system; and (4) system administrative directive to re-boot system from a selected one of said at least one disk;

subsequently completing a full boot of the SAN system from the boot image stored on the at least one disk, wherein the SAN system's boot operation is completed from within said volume group, rather than from the primary boot device, from which the boot image is copied to the at least one disk;

reading of the boot image at SAN speed, wherein further no boot images are pulled from across the network;

installing images from the boot logical volume at said SAN speed; and

wherein when one of a system failure and a system recovery from a corrupted boot image on a primary disk occurs, said switching further comprises:

booting up the SAN system in maintenance mode;

generating a prompt for a system administrator to select the boot device from among a displayed list of available boot devices; and

automatically encoding the identification and routing information of the selected boot device in a BIOS (basic input/output system) path for accessing the boot device to complete a boot of the SAN system, wherein the boot device selected is the at least one disk within the volume group.

4. There is no motivation to make or use the combination of all of Applicant's features as claimed, barring the use of improper hindsight. Prior art exists that teaches installation of boot systems on a SAN. All of the specifics of the boot switching system claimed by Applicant are not present in any one piece of art, such as reading the boot image at SAN speed, encoding a boot device in BIOS to boot the SAN based on an administrator's prompt, a distributed boot image system, and copying boot images within the volume group. No motivation exists to combine all of these elements into a single SAN boot system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
